SUMMARY

Multidisciplinary developer specializing in Django, Flutter, and AI/ML-driven web applications, with 2+ years of hands-on project experience building responsive, production-ready digital experiences. Currently pursuing a B.Tech in Computer Science (AI/ML); open to internship and part-time opportunities.

EDUCATION

P P Savani University
B.Tech in Computer Science & Engineering (AI/ML)
CGPA: 7.91 (Year 1), 7.92 (Year 2)

2024 – 2028 (Expected)
India

TECHNICAL SKILLS

- Languages:** Python, HTML/CSS, SQL
- AI/ML & Automation:** LLM Integration, Prompt Engineering, AI API Integration, NumPy, Pandas, Gemini AI, Claude AI, Kimi AI, AI Dashboard Development, AI Automation
- Backend & Databases:** Django, Firebase, MongoDB, Neon DB
- Frontend & Mobile:** Tailwind CSS, FlutterFlow, Figma
- Tools & Platforms:** Render, Vercel, Google Colab, Anaconda, Git/GitHub, Stitch

EXPERIENCE

- Frontend Developer Intern**
Edverb
- 4 Months
India
- Built and structured complete front-end architecture for two fully responsive, production-live websites (Edverb, Blackbanana)
 - Translated design requirements into clean, functional interfaces, contributing directly to client-facing platforms
 - Received a formal Letter of Recommendation for technical contribution and professional performance
- Freelance Web Developer**
Self-Employed
- Ongoing
Remote
- Delivered end-to-end websites from design through deployment for business and management clients
 - Managed client requirements, project timelines, and quality delivery across multiple independent engagements

LEADERSHIP

- Vice President**
EBC Club, P P Savani University
- 2025 – Present
India
- Led event coordination for major university-wide technical fests
 - Managed and directed a team of 50+ student members
 - Served as liaison between faculty and students to ensure smooth event operations

PROJECTS

- Grantpilot** | *Django, Python*
- SSIP Grant: Rs. 30,000
- Built an SSIP-supported platform to manage and track student innovation and grant-related workflows
- DataMorphix** | *React, Django REST, Python, Pandas, Gemini AI, Tailwind CSS*
- AI-powered intelligent data dictionary that analyzes CSV, Excel, and JSON files to generate dataset summaries, health scores, and natural-language dataset queries
- EcoSortX** | *Python, Machine Learning, OpenCV, Raspberry Pi, Computer Vision*
- AI-powered smart waste segregation system using computer vision on a Raspberry Pi, trained on 30,000+ images to classify waste as wet or dry
- Clinic Appointment System** | *Django, Tailwind CSS*
- Full-stack platform for clinics to manage patient bookings, doctor listings, and real-time availability tracking
- GeoBus** | *FlutterFlow, Firebase*
- SSIP Grant: Rs. 15,000
- Developed an SSIP-supported real-time GPS bus tracking system giving parents and schools live location updates
- Cricktraker** | *App Development, Sports Tech*
- SSIP Grant: Rs. 20,000
- Comprehensive cricket scoring and tournament tracking platform, similar to Cricheroes

ACHIEVEMENTS

- Secured **1st Place** in a university-level Website Building Competition, designing and developing a highly responsive, interactive web project under a strict time limit
- Ranked in the **Top 10 of 165 teams** at Indux 5.0, a national-level hackathon
- Awarded **Rs. 65,000** in cumulative SSIP government grants across three funded projects (Grantpilot, Cricktraker, GeoBus)
- Received a **Letter of Recommendation** from Edverb in recognition of technical skills and project contributions
